

Special Needs Policy

If at any time a teacher or staff member has concerns regarding the development of a child, the following guidelines should be followed:

1. Teachers use observations and assessments to track child's progress according to the developmental milestones.
2. Teachers will discuss their concerns and observations with their supervisor.
3. Teachers share the results of the assessments with families during conferences.
4. Working with the parents as a team, social and educational providers may be asked to complete additional observations.
5. Referrals may be made to other appropriate professionals, when needed.
6. Teachers and staff will work collaboratively with parents and referred providers to implement individual child plans
